

## Package Contents

- |                               |                  |
|-------------------------------|------------------|
| 1. Prestigio Webcam Main Unit | 3. Quick Guide   |
| 2. Utility CD                 | 4. Warranty Card |

## Getting Started

1. Turn on PC or notebook.
2. Insert USB connector to any of the USB slot on PC or notebook.
3. After connecting device to PC or notebook and inserting Utility CD install, the installation window should pop up automatically.
4. Click on **Next** button to initiate installation process
5. Utility software will be automatically installed.
6. Click on **Finish** button to complete installation
7. When the installation is completed, the camera icon will appear in system tray, you can also find **USB Video Device/AMCAP** or **USB Video Device** in the Start menu.
8. Now is ready for use.

### NOTE:

1. To utilize all device functions, please follow instructions in next section to install included utility software.
2. Click on **Next** button to initiate installation process or **Cancel** button to exit.
3. Please click on **Ok** when prompted to install **Unsigned Driver**. This is a Windows system warning that indicates the specific driver program is not certified by Windows.

4. The driver software of 1080P webcam is bundled with **"Camera Manager"**, please refer to full manual in CD for more information.

## Using Utility Software

Click on Start → All Programs → USB Video Device → AMCAP to start using utility software.

- **File** menu:

Click on **Set Capture File** to create file name and designate maximum video streaming size.

- **Devices** menu:

Click on device name to select video/audio input source.

- **Options** menu:

Click on **Preview** to display live streaming capture. Click on **Audio Format** to adjust sound quality.

Click on **Audio Capture Filter** to master audio input properties and individual audio input properties.

Click on **Video Capture Filter** to adjust various advanced video features including Special Effect on images/photo frame, Face Tracking, Face Effect, Power Line Frequency Setting, Video Proc Amp and Camera Control.

Click on **Video Capture Pin** to adjust video streaming parameters. Adjust **Output Size** to best resolution desired.

#### NOTE:

Best image resolution may not be the largest resolution.

- **Capture menu:**  
Click on **Start Capture/Stop Capture** to create a video clip. Click on **Set Frame Rate** to set number of image frames per second. Click on **Set Time Limit** to designate video clip time limit.

## Cautions

- Do not attempt to disassemble or alter any part of the device that is not described in this guide.
- Do not place the device in contact with water or any other liquids. The device is NOT designed to be liquid proof of any sort.
- In the event of liquid entry into interior of device, immediately disconnect the device from the computer. Continuing use of the

device may result in fire or electrical shock. Please consult your product distributor or the closest support center.

- To avoid risk of electrical shock, do not connect or disconnect the device with wet hands.
- Do not place the device near a heat source or directly expose it to flame or heat.
