

Upgrading Instructions (PER3562B)

1. Prepare a clean SD card
2. Download the update package from the link that we provide
3. Unzip the update package to root of SD card, Or just place the *.upx file into the root of SD Card. Please check the below image

The route should look like " *\$ROOT_SD\PER3562-V0.52(11-07-11).upx* "

4. Turn device off and insert SD Card to the device
5. Press the "OK" button without release, then press the "Power" button, then release the "OK" button till you see the startup screen.
6. Then you will see the following two images in order.

7. The device will restart automatically when the upgrade is finished
8. If the update file is not available, it will show the following image

Note: Due to the changes of upgrading program itself, if "PER3562-V0.52(11-07-11).upx" can not be matched as an update package, then please change this file to "prestigio_update_60.upx"
